# What Makes Florida Great

Florida really is a great place to go to and whilst most of the time you are not going to need one of those brilliant [Florida Guide it certainly comes in useful and this is simply because there is so much to do out there!](#)

### Time To Eat

If I am typing honestly here, most of the restaurants found in Florida are chain restaurants but it is pretty safe to say that there are also thousands of others you will not see anywhere else. Although ones like the Golden Corral are located across the US I have not experienced any other one that has done their world famous [golden corral volcano pudding cake as well as the chains in Florida do. most of the restaurants out there aree actually buffet ones which means you need to be careful when you are out there because it is actually very easy to put on a few pounds when you are out on vacation there, trust me on this one.](#)

### Time For Theme Parks

Okay so the main reason people travel out to Florida is not because of the food but because of the theme parks like the [Wizardsing World of Harry Potter and who can blame them, they truly are fantastic! There are so many theme parks out there including Disney and Universal studios, it is great stuff. These are not the only two and there are many others out there like SeaWorld, Gator Land and of course who could forget Busch Gardens.](#)

If you have never been to Florida before I really would thoroughly recommend it because it is great fun not just for a family or kids but for anyone and people of all ages. getting out there to have fun is the main thing!
